

Demo walkthrough

Every live-demo step of the presentation guide, rehearsed and screenshotted — so each speaker knows exactly what comes next.

Result

28 of 28 steps passed on the real backend (local GPU with ColPali, the hosted model through CLIPProxyAPI, the local Whisper voice service, PostgreSQL), and **6 of 6** Google steps passed on the demo server's simulated Google account. The run used a fresh presenter account prepared exactly as the guide's setup checklist says, and the same clicks, words and files the speakers will use. The screenshots are 1440 × 900, as a projector shows them.

Section	Speaker	Steps	Passed	Measured times
1	Tonmoy (2105076)	3	3/3	signed in 2 s
2	Enayet (2105107)	9	9/9	—
3	Mukdho (2105064)	7	7/7	chat answer 10 s
4	Shafi (2105097)	10	10/10	spoken question answered 16 s
5	Ahtashamul (2105067)	4	4/4	PDF downloaded 81 s

What the rehearsal found — and what was fixed

- **Onboarding did not link its documents to the new project**, so a question naming Padma View found no documents in its scope. *Fixed in the code*: committing a draft now links each source document to the project it describes (8 of 8 linked in the rehearsal).
- **“Padma View” did not count as naming “Padma View Specialised Hospital Extension”**, so the answer was not scoped to the project. *Fixed*: the first two or more words of a project's name now count too; the answer now says “Searched only Padma View ...”.
- **The homepage button reads “Open BuildMarshal”**, not “Sign in” (that link is in the footer). *Guide corrected*.
- **Drive shows nothing until you press “Load files”**. *Guide corrected*: Load files, then click a folder.
- **Name the meeting explicitly** (“...a Google Meet called RFI log review...”): the real model then titles it “RFI log review”, where “about the RFI log” gives “RFI log”. Checked against the real model. *Guide corrected*.
- **The generated PDF showed a raw timestamp** (2026-09-30T02:53:54.48...+00:00). *Fixed*: it now reads “30 Sep 2026, 02:53 UTC”.
- **Closing the Generate Doc dialog while it runs is safe**: the PDF still downloads when ready (82 s). The guide now tells Ahtashamul to close it with × before going to User Roles.
- **Setup notes added to the guide**: give the presenter account a name that is not in the pack's team list (a duplicate name leaves the manager unset); start a fresh chat before the talk; leave one unfiled chat attachment so the Unassigned filter has something to show.

Not rehearsed live

Booking a real meeting on a **real** Google account: the rehearsal account has no Google link, and booking would send real invitations. The same screens and the same confirm-then-create protocol were rehearsed on the simulated account, and the real model's reading of the meeting sentence was checked separately. **On the morning of the talk, reconnect Google and book one test meeting with your own address.**

1

The problem, the idea, and the architecture at a glance

Tonmoy (2105076)

Step 1.1 Homepage PASS

The public homepage at localhost:5500. The hero button reads “Open BuildMarshal” (the footer also has “Sign in”).

Step 1.2 Sign-in screen PASS

“Open BuildMarshal” leads to the sign-in screen; the presenter's email and password are entered.

Step 1.3 Signed in PASS · 2 s

Signed in as a Head (Super Admin); the app opens on Projects → All Projects, with Padma View already there.

The screenshot displays the BUILD MARSHAL application interface. On the left is a dark sidebar with navigation options: Marshal Chat, Tasks, To-Do Lists, Onboarding, Projects (selected), Project Details, Calendar, Documents (with a red notification badge), Google Workspace, Microsoft 365, Company Settings, Settings, and Connected. The main content area is titled 'Projects' and shows a filter bar with fields for Name, Manager, Type, Status, Start Date, and End Date. Below the filters is a table with one project entry: 'Padma View Specialised Hospital Extension' (Project Code: PVH-2026, Manager: Md. Rafiqul Islam, Status: Active). On the right, a 'What are the working hours on site for Padma View?' chat window is open, displaying project specifications and a source link. At the bottom right, there is an 'EVIDENCE' section showing document analysis results for three files.

Description

Step 2.5 Task corrected PASS

The start moved inside the project and an assignee chosen from the project's people only.

Step 2.6 Task saved PASS

Saved: the task is in the project's task list with its assignee.

Step 2.7 Timeline PASS

Padma View Specialised Hospital Extension: the Timeline draws every onboarded task against the project window.

Observed: 41 rows

Step 2.8 Statistics PASS

Statistics: planned against earned value, budget and commitment, cost by trade, and the Attention list.

Step 2.9 Statistics — Attention PASS

Further down: the Attention list of rule-based risks, each saying what it is based on.

The screenshot displays the Build Marshal AI interface, which is divided into three main sections: a left sidebar, a central project details area, and a right chat window.

Left Sidebar: Contains navigation links for 'BUILD MARSHAL', 'Marshal Chat', 'Tasks', 'To-Do Lists', 'Onboarding', 'Projects' (with a sub-link for 'All Projects'), 'Project Details' (highlighted), 'Calendar', 'Documents' (with a red notification badge), 'Google Workspace', 'Microsoft 365', 'Company Settings', 'Settings', and 'Connected'.

Central Project Details Area: Titled 'Project Details', it shows progress bars for 'Electrical' (4.51 Cr) and 'Masonry' (4.20 Cr). It also lists 'Unassigned' tasks for 'Kamrul Hasan' (2/2) and 'Open' tasks (1/2). Below this is an 'Attention' section with five rule-based risks, each with a severity level (MEDIUM or LOW):

- 2 task(s) are past their date (MEDIUM):** The oldest is "Level 2 slab casting", 27 day(s) overdue.
- 1 task(s) are blocked (MEDIUM):** That is 2% of the work on this project.
- 4 task(s) have been in progress a long time (MEDIUM):** "Superstructure" has been open 80 days.
- Delivery is slowing (MEDIUM):** Completions are down against the previous weeks (now about 0.12 per week).
- 2 open task(s) have nobody on them (LOW):** Unowned work tends to be the work that slips.

Below the risks is a 'Marshal's reading' section, which states: 'Marshal is given the figures above and asked to explain them. It is told not to state a number it was not given, and not to invent a cause.' A button labeled 'Ask Marshal to read the figures' is present.

Right Chat Window: Titled 'Marshal Connected', it shows a user query: 'What are the working hours on site for Padma View?'. The response provides project specifications, including general working hours (08:00 to 18:00, Saturday to Thursday), weekly holiday & non-working days (Friday), and noisy operations (any operations producing noise above 75 dB(A) at the site boundary are further restricted to 09:00 to 17:00 due to the adjoining outpatient department remaining in clinical use). The source is cited as '86_Tender-Specification.pdf, Page 1, Section 1.1 ("Working hours")'. Below the text is an 'EVIDENCE' section showing three document thumbnails with their respective text match scores: '06_Tender-Specific...' (98%), '01_Project-Brief.pdf' (64%), and '02_Work' (63%).

3

Documents in, answers out: ingestion and hybrid retrieval

Mukdho (2105064)

Step 3.1 Upload into the project PASS

Upload: the site instruction is indexed straight into the project (□ Ready).

The screenshot displays the 'Project Details' page for 'Bashundhara Clinic Annex'. The left sidebar shows navigation options like 'Marshal Chat', 'Tasks', 'To-Do Lists', 'Onboarding', 'Projects', 'Calendar', 'Documents', 'Google Workspace', 'Microsoft 365', and 'Company Settings'. The main content area shows project status (Active), start date (2026-09-30), end date (2026-12-29), and address fields (Line 1, Line 2, City, State, Postal Code, Country). Below these are 'Project Tasks' (Site mobilisation) and 'Project Documents' (0 documents). A modal titled 'Upload Project Documents' is open on the right, showing a list of indexed documents (10 files) including '01_Project-Brief.pdf', '02_Works-Programme.xlsx', '03_Project-Team.xlsx', '04_Procurement-Schedule.xlsx', '05_Cost-Plan.csv', and '06_Tender-Specification.pdf'. Each document is marked as 'Ready'.

Step 3.2 Link existing PASS

Link existing: search "Tender", tick the tender specification (it shows it already belongs to Padma View).

The screenshot shows the 'Link Existing Documents' modal. A message at the top states: 'Already in the account as "09_Site-Instruction_SI-014.docx"; linked it to this project instead of storing a second copy.' The modal prompts the user to 'Choose documents to add to Bashundhara Clinic Annex. They are linked, not copied: each stays one document, on every project it is linked to.' A search bar contains 'Tender', and a dropdown menu shows 'From anywhere'. A list of documents is displayed, with '06_Tender-Specification.pdf' selected (checked). The document details are: 'Onboarding - 3 pages' and 'Project: Padma View Specialised Hospital Extension'. The modal has 'Cancel' and 'Save' buttons. The background shows the 'Project Details' page with the 'Project Documents' section now showing 1 document.

Step 3.3 Linked PASS

Project Documents now lists the site instruction and the linked tender specification ("Also on: Padma View ...").

Padma View Specialised Hospital Extension

Tender Specification & Preliminaries · দরপত্র বিবরণী
PVH-2026 · Revision C · Issued 14 September 2026

1. Preliminaries and general conditions

1.1 Working hours

Working hours on site are 08:00 to 18:00, Saturday to Thursday. **Friday is the weekly holiday** and no work is permitted on Friday or on public holidays. Noisy operations — anything above **75 dB(A) at the site boundary** — are further restricted to **09:00 to 17:00**, because the adjoining outpatient department remains in clinical use throughout the works.

1.2 Deliveries and site access

All deliveries shall be booked with the site office at least 48 hours in advance. The single site access is from Road 4, Sector 11. No deliveries are permitted between 07:30 and 09:00, when patients are arriving.

1.3 Monsoon provisions

From June to September the Contractor shall maintain adequate covering, pumping and temporary drainage for open slabs and castings. Claims for weather delay are admissible only with Bangladesh Meteorological Department records for the days claimed.

The interface: voice, chat actions, and Google Workspace

Shafi (2105097)

Step 4.1 Recording PASS

The mic: a "Recording..." notification at the top centre, the button turns into a red stop.

The screenshot shows the Marshal Chat interface. On the left is a dark sidebar with navigation options: BUILD MARSHAL, Marshal Chat, Tasks, To-Do Lists, Onboarding, Projects, All Projects, Project Details, Calendar, Documents (with a red notification badge), Google Workspace, Microsoft 365, Company Settings, Settings, and Connected. The main area is titled 'Marshal Chat' and features a robot icon and the text 'Ask questions about your uploaded documents. Upload PDFs, images, audio files, and more.' At the top center, a notification bar says 'Recording... click the red stop button when finished.' with a red stop button. In the top right, there's a user profile for 'Demo Presenter HEAD (SUPER ADMIN)' and a 'Marshal Connected' status. On the right side, a chat window titled 'View?' shows a search result for 'Padma View Specialised Hospital Extension's documents'. It includes a summary of RFI response periods: 'Standard RFIs: The consultant team must respond within 7 working days' and 'Urgent RFIs (affecting the critical path): Must be marked Urgent and answered within 3 working days'. It also lists a source: '06_Tender-Specification.pdf, Page 1, Section 2.1 ("Requests for information")'. Below this is an 'EVIDENCE' section with three document thumbnails and their respective text match percentages: 67%, 63%, and 45%. At the bottom of the chat window, there's a text input field with a microphone icon and a 'Ask about your documents...' button.

Step 4.2 Transcript for review PASS

Whisper's transcript lands in the box to be checked — nothing is sent yet.

Observed: 'What are the working hours on site for Padma View?'

This screenshot shows the same Marshal Chat interface as the previous one, but now the recording has ended. The top center notification bar now says 'Voice transcribed (EN). Review' with a red stop button and a 'Settings' button. The chat window on the right remains the same, showing the search results for 'Padma View Specialised Hospital Extension's documents'. The 'EVIDENCE' section still displays the three document thumbnails and their text match percentages. At the bottom of the chat window, the text input field now contains the transcript: 'What are the working hours on site for Padma View?' with a microphone icon and a 'Send' button.

Step 4.3 Spoken question answered **PASS** · 16 s

Sent: 08:00 to 18:00, Saturday to Thursday, Friday off — cited from the tender.

Observed: Searched only Padma View Specialised Hospital Extension's documents (named in the question). Based on the project specifications and projec

The screenshot shows the 'Marshal Chat' interface. On the left is a dark sidebar with navigation options: 'BUILD MARSHAL', 'Marshal Chat', 'Tasks', 'To-Do Lists', 'Onboarding', 'Projects' (with a sub-menu for 'All Projects' and 'Project Details'), 'Calendar', 'Documents' (with a red notification badge), 'Google Workspace', 'Microsoft 365', 'Company Settings', 'Settings', and 'Connected'. The main chat area has a header 'Marshal Chat' and a robot icon. Below the icon, it says 'Ask questions about your uploaded documents. Upload PDFs, images, audio files, and more.' On the right, there is a chat window titled 'Marshal Connected'. It contains a message about site hours and restrictions, followed by a section titled 'EVIDENCE' showing three document thumbnails with their respective page numbers and match percentages. At the bottom of the chat window is a text input field with a microphone icon and a 'Ask about your documents...' button.

Step 4.4 Google Workspace (this account) **PASS**

Google Workspace on an account that has not linked Google: it offers to connect one. The live demo needs the presenter's account connected beforehand.

Observed: not connected — see the simulated walkthrough below

The screenshot shows the 'Google Workspace' connection screen within the Marshal Chat interface. The sidebar is identical to the previous screenshot. The main chat area has a header 'Google Workspace' and a sub-header 'Index Drive files and email, compose Gmail messages, and use Calendar events with Marshal.' Below this is a large white box with a blue person icon and the text 'Connect a Google Workspace account'. It explains that BuildMarshal will request read-only Drive and Gmail access, Gmail compose access, and Calendar event access, and that it never returns the refresh token to the browser. A blue button labeled 'Continue with Google' is at the bottom of this box. On the right, the chat window titled 'Marshal Connected' is visible, showing the same message and evidence as in the previous screenshot. At the bottom of the chat window is a text input field with a microphone icon and a 'Ask about your documents...' button.

The Google steps below were rehearsed on the demo server's simulated Google account (every reply there is marked simulated). On the day, use the presenter's connected account.

Step 4.5 Google Workspace page PASS · simulated Google

Google Workspace with a connected account: account, Drive, Gmail and Calendar in one page.

Observed: simulated account

The screenshot shows the Google Workspace interface within the BUILD MARSHAL application. The sidebar on the left contains navigation options: Marshal Chat, Tasks, To-Do Lists, Onboarding, Projects, All Projects, Project Details, Calendar, Documents, Google Workspace (selected), Microsoft 365, Company Settings, Settings, and Connected. The main content area is titled 'Google Workspace' and includes a search bar for 'rafiqui.islam@purbachalcon.example', an 'Add account' button, and a notification that Microsoft 365 is also connected. Below this, there's a profile card for 'Md. Rafiqui Islam' and links to Drive, Gmail, and Calendar. A 'Search Drive' section is visible with a 'Load files' button. The right sidebar shows a chat window with a message about scheduling a meeting, including details like duration (60 minutes), attendees (nusrat.jahan@purbachalcon.example), and a Google Meet link.

Step 4.6 Drive: Load files PASS · simulated Google

Drive: press Load files first (the table is empty until you do); the connected Drive's folders and files appear.

Observed: 7 items

The screenshot shows the Google Workspace interface with the Drive section selected. The 'Load files' button has been pressed, and a table of files and folders is displayed. The table has columns for Name, Type, and Modified. The files listed are:

Name	Type	Modified
PVH-2026 Project Files	Google folder	8/19/2026, 10:00:00 AM
RAJUK Approved Drawings.pdf	application/pdf	8/27/2026, 10:00:00 AM
Soil Test Report - Uttara Sector 11.pdf	application/pdf	3/16/2026, 10:00:00 AM
Monthly Progress - August 2026.xlsx	Office spreadsheetml.sheet	9/11/2026, 10:00:00 AM

The right sidebar shows the same chat window as in Step 4.5, with a message about scheduling a meeting.

Step 4.7 Drive: open a folder **PASS** · simulated Google

Click a folder name to open it; files can then be ticked and indexed into a project with Index selected.

Observed: opened 'PVH-2026 Project Files'

The screenshot shows the Google Workspace interface integrated into the Marshal application. The left sidebar contains the 'BUILD MARSHAL' menu with various navigation options. The main workspace area displays the Google Drive interface, showing a list of files and folders. The 'PVH-2026 Project Files' folder is selected. The right sidebar shows a chat window with a message from 'nusrat.jahan@purbachalcon.example' asking to schedule a meeting. A blue button labeled 'yes' is visible.

Step 4.8 Meeting proposed **PASS** · simulated Google

"Schedule a Google Meet with ... tomorrow at 10am about the RFI log": Marshal shows the meeting it will create and asks for a yes.

Observed: Here is the meeting I will create in Google Calendar with a Google Meet link: the RFI log When: 10/1/2026, 10:00:00 AM – 11:00 AM (Asia/Dhaka) Dur

The screenshot shows the Marshal Chat interface. The left sidebar contains the 'BUILD MARSHAL' menu. The main chat area displays a message from 'nusrat.jahan@purbachalcon.example' asking to schedule a meeting. A blue button labeled 'Schedule a Google Meet with nusrat.jahan@purbachalcon.example tomorrow at 10am about the RFI log' is visible. The right sidebar shows a chat window with a message from 'nusrat.jahan@purbachalcon.example' asking to schedule a meeting. A blue button labeled 'yes' is visible.

Step 4.9 Meeting created PASS · simulated Google

Replying “yes” books it and returns the Meet link.

Observed: Scheduled the RFI log in Google Calendar. the RFI log When: 10/1/2026, 10:00:00 AM – 11:00 AM (Asia/Dhaka)

Duration: 60 minutes Attendees: nusra

The screenshot shows the Marshal Chat interface. On the left is a sidebar with navigation options: Marshal Chat, Tasks, To-Do Lists, Onboarding, Projects, All Projects, Project Details, Calendar, Documents, Google Workspace, Microsoft 365, and Company Settings. The main chat area shows a conversation with 'Md. Rafiqul Islam HEAD (SUPER ADMIN)'. The chat history includes a message about scheduling a meeting in Google Calendar for 10/1/2026, 10:00:00 AM – 11:00 AM (Asia/Dhaka), with a duration of 60 minutes and attendees nusrat.jahan@purbachalcon.example. A 'yes' button is visible next to the message. The bottom of the chat area has a text input field with a microphone icon and a 'Send' button.

Step 4.10 Calendar page PASS · simulated Google

Calendar: project dates, task dates and the connected calendar's events in one view.

Observed: the simulated booking is not persisted, so the rehearsal event does not appear here; a real Google booking does

The screenshot shows the Marshal Calendar interface. On the left is the same sidebar as in Step 4.9. The main calendar area shows a calendar view for September 2026. The calendar displays events for each day, including 'Padma View ...', 'Superstructure', 'Level 2 slab c...', 'Level 3 slab c...', and 'Envelope & R...'. The right sidebar shows the same chat history as in Step 4.9, including the message about scheduling a meeting in Google Calendar for 10/1/2026, 10:00:00 AM – 11:00 AM (Asia/Dhaka), with a duration of 60 minutes and attendees nusrat.jahan@purbachalcon.example. A 'yes' button is visible next to the message. The bottom of the calendar area has a text input field with a microphone icon and a 'Send' button.

5

Under the hood, a generated document, and what we learned

Ahtashamul (2105067)

Step 5.1 Generate Doc dialog PASS

Generate Doc: Document Type Tender Summary; the button reads Generate PDF.

Step 5.2 Generating PASS

Generating... — the dialog stays open while the model writes each section.

Step 5.3 User Roles (while it generates) PASS

Company Settings → User Roles: the two built-in roles and the custom ones, each exactly its ticked permissions.

The screenshot displays the 'User Roles' management page within the Build Marshal AI application. The interface is divided into several sections:

- Left Sidebar:** Contains navigation links for 'BUILD MARSHAL', 'Marshal Chat', 'Tasks', 'To-Do Lists', 'Onboarding', 'Projects' (with sub-links for 'All Projects' and 'Project Details'), 'Calendar', 'Documents', 'Google Workspace', 'Microsoft 365', 'Company Settings' (highlighted), 'Company Info', 'Trades', 'External Companies', 'Project Types', and 'Task Types'.
- Header:** Shows the user 'Demo Presenter HEAD (SUPER ADMIN)' and a 'Settings' button.
- Main Content Area:**
 - User Roles:** A section with a '+ Create Role' button and a 'Total: 6' indicator.
 - Role Cards:** Six cards representing different roles:
 - Head (Super Admin) [Built-in]:** Full access to everything, and the only role that can manage roles and permissions. 2 users, All permissions.
 - Head (System Admin) [Built-in]:** Account administration: users, company settings, and workspace catalogues. 0 users, All permissions.
 - Project Manager:** Full project and task control, may approve costs. 2 users, 0 permissions.
 - Cost Manager:** Costs and procurement, read-only on tasks. 1 user, 0 permissions.
 - Viewer:** Read-only access to the project, no editing. 3 users, 0 permissions.
 - Site Supervisor:** Task status and progress updates, no cost visibility. 3 users, 0 permissions.
- Right Panel:** A chat window titled 'Evidence' showing a document analysis summary for '06_Tender-Specific...' and '01_Project-Brief.pdf'. It includes a list of sources and a search bar at the bottom.

Step 5.4 PDF downloaded PASS · 81 s

The Tender Summary PDF downloads by itself when it is ready, even with the dialog closed. Observed: Tender_Summary_-_Padma_View_Specialised_Hospital_Extension.pdf

The downloaded Tender Summary — cover and first cited section:

Tender Summary - Padma View Specialised Hospital Extension

Consolidated tender requirements, scope, dates, revisions, and clarifications.

Project	Padma View Specialised Hospital Extension
Project code	PVH-2026
Generated	2026-09-30T02:53:54.482781+00:00
Evidence policy	Only project-linked source PDFs; citations identify document and page.

1. Project Overview

The project comprises the Padma View Specialised Hospital Extension (Project Code: PVH-2026). The works serve to expand hospital healthcare facilities, including RCC framed structures to Level 5, operation theatre fit-out, and comprehensive MEP installations, executed adjacent to an operational outpatient department.

The employer (client) is Meghna Health Foundation (Principal Contact: Dr. Anisur Rahman). Tender documentation includes Tender Specification & Preliminaries Revision C issued on 14 September 2026, reflecting an elemental cost plan contract sum of BDT 600,000,000 (₹ 60.00 crore) and a scheduled completion date of 30 June 2027.

- Project: Padma View Specialised Hospital Extension (PVH-2026)
- Client / Employer: Meghna Health Foundation
- Site Location: Accessed via Road 4, Sector 11 (adjoining active outpatient department; broader city/district not specified in evidence)
- Contract Sum: BDT 600,000,000 (₹ 60.00 crore)
- Completion Target: 30 June 2027

2. Submission Requirements

Specific tender submission requirements—such as tender closing deadlines, delivery methods, mandatory bid submission contents, and proponent bidding obligations—are not available in the provided documents. The documentation reflects an appointed contractor (Purbachal Construction Ltd) and details handover submittal and site obligations.

- Site delivery obligations: Deliveries must be booked 48 hours in advance; deliveries are prohibited between 07:30 and 09:00.
- Sample submission: A full-size aluminium glazing sample panel must be erected on site and approved in writing by the Architect prior to manufacture release.
- Training obligation: Four building user training sessions must be conducted 2 weeks before completion.

Deliverable	Due Date	Format
Draft O&M manuals	8 weeks before completion	PDF, indexed
Final O&M manuals	At completion	PDF and 2 hard copies
As-built drawings	At completion	PDF and native CAD
Test and commissioning certificates	2 weeks before completion	PDF
Fire Service clearance	Before commissioning	Original
RAJUK occupancy certificate	At completion	Original
